

Serial No. 10/016,131 Page 2

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1, 2 and 3: (CANCELLED).

4. (CURRENTLY AMENDED) ~~The fluidic spray system defined in claim 2~~ A liquid spray in which the spray droplets have a momentum which allows spray droplets to be delivered to a selected surface area without said spray droplets bouncing off of said selected surface, comprising, a fluidic oscillator connected to a source of liquid under pressure and wherein said fluidic oscillator is selected from:

- (a) a multiple power nozzle oscillator,
- (b) a reversing chamber oscillator, and
- (c) a feedback oscillator, and

a non-restrictor pressure reducer upstream of said fluidic oscillator, and wherein said non-restrictor pressure reducer is a vortex valve.

Claim 5: (CANCELLED).

6. (PREVIOUSLY PRESENTED) A fluidic spray system for producing a liquid spray in which the spray droplets have a momentum such that said spray droplets do not bounce on impacting a surface and allows substantially unrestricted flows to be

Serial No. 10/016,131 Page 3

delivered to a point of utilization on said surface comprising a fluidic oscillator having an input coupled to a supply of liquid under pressure and a vortex valve immediately upstream of said fluidic oscillator, said vortex valve having an output which is connected to the input of said fluidic oscillator.

7. (PREVIOUSLY PRESENTED) A fluidic oscillator spray system comprising a fluidic oscillator and non-restrictor pressure reducing means coupling said oscillator to a source of liquid for producing a liquid spray in which the spray droplets have a momentum and allows for producing droplets of larger diameters and a selected range of diameters for similar operating pressures.

Claims 8 - 13: (CANCELLED).
